

Early Intervention Services: The Bright Beginnings Program addresses the broad range of developmental skills by providing services for students including those who are at-risk as well as those who are performing beyond the expectations of the general curriculum.

A speech-language pathologist services the classroom to provide language enrichment activities for all students and to meet the specific needs of young children with speech-language delays. Additional services such as occupational therapy, physical therapy, and social work are also provided for students when specific needs in these areas are identified.

To enrich the curriculum for students performing beyond expectations, differentiated center activities are developed for each theme as well as small group teacher directed literacy activities to extend and further develop their skills.
